

PRODUCT INFORMATION SHEET
A.D.M.P

Automatic Dishwashing Machine Powder (ADMP) a granular white powder with a mild chlorine odour. Recommended for use in commercial or domestic dishwashing machines

FEATURES

- ADMP contains a high level of phosphate. These soften the water, and so prevent scale formation in the dishwasher.
- It also contains chlorine to bleach out tannin stains in tea and coffee cups

HOW TO USE

- Use in commercial machines, such as a Hobart AM100 or AM12, add ½ cup to the wash tank initially, then add 1 teaspoon per rack washed to maintain performance.
- For commercial machines with a smaller wash tank of around 30 litres capacity, add ¼ cup initially
- In domestic machines add 3-4 teaspoons to the dispenser cup
