

# AIRx BIN BLASTER

## Concentrated Deo-Degreaser

Water activated degreaser/cleaner & odour counteractant for garbage bins & waste collection equipment.

**AirX Bin Blaster** is specially formulated for the heavy duty cleaning & degreasing of refuse containers & their surrounding areas, & for the elimination of the foul odours that are associated with them.

There are no worse odours than those emanating from industrial bins, garbage trucks, compactors & similar equipment. Their smell can often be so obnoxious that a person literally cannot get close enough to the problem to work on it. Now with **AirX Bin Blaster** the problem can be solved quickly & pleasantly.

A quick spray of **AirX Bin Blaster** eliminates the foul odour. Then, powerful degreasers in the product penetrate, loosen & emulsify grime & soil so that they can be easily rinsed away.

**AirX Bin Blaster** contains no chlorinated solvents. Instead it uses a potent natural solvent with superior ability to remove stubborn, greasy soils. It also contains highly concentrated iricide odor counteractant in a unique water release form. These odor counteractants work well on their own, but when they contact moisture in the refuse, or when **AirX Bin Blaster** is sprayed with water, the effect is intensified.

This one product, in one operation, eliminates odours & removes their source better than any deodorisers & degreasers used separately.

### Benefits

- **DEODOURISES** - like other AirX products **AirX Bin Blaster** contains Airicide, a proprietary odour counteractant that merges with foul odor molecules in the air to change their "geometry" so that they are not recognized as unpleasant when they reach the nose.
- **HIGHLY CONCENTRATED** - The odour counteractants contained in **AirX Bin Blaster** are so powerful they are effective even when diluted 1:500. This means that **AirX Bin Blaster** is concentrated enough to take on the biggest of jobs.
- **MOISTURE ACTIVATED** - Spraying with water, which dilutes & reduces the effectiveness of other deodorizers, actually enhances the odour neutralizing power of **AirX Bin Blaster**.
- **WIDE USAGE** - Counteracts odors from garbage, fast, oils, fermentation, decay, mildew etc & removes the source of such odours for long lasting effectiveness.

# AirX Bin Blaster Concentrated Deo-Degreaser

**AirX Bin Blaster** is a high-powered degreaser-cleaner designed for removal of heavy, smelly, greasy soil that accumulates in & around refuse rendering, collection & disposal equipment. It is also an unusually effective deodourizer that releases Airicide odour counteractant when contacting or being contacted by moisture. It can be used on any surface not affected by solvent degreasers.

## Uses

**For degreasing, cleaning & especially for deodourizing** dumpsters, compactors, bulk trash containers, public waste receptacles, garbage cans, grease pits, compactor rooms, drop chutes & trash chutes, rendering trucks etc.

May also be sprayed on the ground below or around collection area for immediate relief.

## Directions

**FOR IMMEDIATE ODOR CONTROL** – Charge a garden type sprayer with concentrated **AirX Bin Blaster** & pump up to be able to stay as far away from foul odours as possible. Apply a coarse spray of **AirX Bin Blaster** to the source of odours. If odours do not immediately disappear spray the area with a fine mist of water.

**FOR CLEANING & DEODOURIZING** – Spray on concentrated **AirX Bin Blaster** with a garden type sprayer as above. Wait 3 to 5 minutes after application then rinse off with high pressure hose or pressure washer.

**FOR GROUNDS DEODOURIZING** – Apply **AirX Bin Blaster** directly into standing water or spray over area then spray with water.

## Specifications

|                           |  |
|---------------------------|--|
| ACTIVITY .....            | 100% active                                    |
| COLOUR.....               | yellowish liquid                               |
| FLASH POINT.....          | greater than ?? °C                             |
| SPECIFIC GRAVITY.....     | 0.925 +/- 0.005 gm/ml                          |
| DENSITY.....              | 7.7  |
| SOLUBILITY IN WATER.....  | quickly emulsifiable                           |
