

AIRX[®] DUAL

Disinfecting & Deodourising Carpet Cleaner

A low foam concentrate carpet cleaner that cleans & sanitizes in one step

AirX Dual Disinfecting & Deodourising Carpet Cleaner offers the same anti-resoil carpet cleaning technology as our **AirX Stay Clean**, but also with a powerful sanitizing agent which is effective against the putrefactive bacteria that cause odours in carpet.

AirX Dual is a highly concentrated, low foam carpet cleaner, formulated for use with all types of carpet 'steam cleaning' or extraction equipment. It is recommended for the cleaning of any carpet made of colour-fast fibres, but its unique sanitising & odour neutralising features make it ideal for use in nursing homes, hospitals, locker rooms, childrens nurseries, restaurants & other locations where odours might develop before or after cleaning.

AirX Dual is a step ahead, in both technology & performance. Its surfactant system removes oily soil without the need for solvents. It emulsifies oil so completely that it eliminates soil redeposition. It is so technologically advanced that both the US & Canadian patents have been granted for its sanitising technology.

Benefits

- **NEUTRALIZES ODOURS FROM BACTERIA**
- **RESISTS RESOILING** - **AirX Dual** does not leave any sticky residues that can attract dirt & lead to resoiling. It will also remove the sticky films left from previously used shampoos.
- **EASIER CLEAN-UP** - **AirX Dual** has superior ability to suspend oily soil. Eliminates the re-deposition of soil in vacuum wands & pick-up tanks.
- **ECONOMICAL** - Each litre of **AirX Dual** cleans over 200m².
- **CONTAINS AIRICIDE ODOUR COUNTERACTANT** to prevent the stale, musty odour that are often common with freshly shampooed carpets, & to remove any odours that may already be lingering in the air.

AirX Dual Disinfecting & Deodourising Carpet Cleaner

AirX Dual is a low foam concentrate carpet shampoo that cleans & sanitises in one step. For use with all models of extraction or steam cleaning equipment. Contains a blend of powerful quaternary ammonium compounds to kill putrefactive bacteria that cause odours. It is also fortified with Airicide odour counteractant to neutralise any odours that may already be in the air. **AirX Dual** also contains built-in defoamers, anti-static agents & optical brighteners to boost cleaning performance.

Uses

For all washable synthetic fiber carpeting, but particularly for cleaning & deodorising carpets in hospitals, nursing homes, child care facilities, locker rooms, restaurants etc. where putrefactive bacteria can cause lingering odours.

Directions

FOR EXTRACTION CLEANING – Dilute 15ml for every 1 litre of water. Inject & extract as you would with other products.

Specifications

DILUTION FOR EXTRACTION CLEANERS 15ml per litre of water
PH CONCENTRATE 12.3 +/- 0.5
PH AT 1:64 USE DILUTION 11.0 +/- 0.5
ODOUR pleasant yet unidentifiable
TYPES OF DETERGENTS non-ionic
FLASH POINT non-flammable
FOAMING low
SOLUBILITY IN HARD WATER complete
COLOUR light amber
FREEZE-THAW STABILITY passes 3 cycles
SHELF LIFE one year minimum
