

AIRx[®] ODOUR EATER

Bio-enzymatic Foul Odour Digester

Contains 50 billion bacteria & enzymes per litre, specially selected to erase stubborn odours & stains.

There are good bacteria & there are bad bacteria. The bad ones can cause sickness & disease while the good ones are instrumental in things like fermenting beer, curing tobacco & processing cheese.

AirX Odour Eater contains only good bacteria, in this case they are special bacteria designed to remove stubborn odours & stains using natural bio-enzymatic reactions.

When the bacteria in **AirX Odour Eater** come into contact with organic matter, they act like sponges to absorb it. The enzymes produced by the bacteria liquefy & then literally digest the matter as their food. No by-products are produced by this process except harmless carbon dioxide & water.

The bacteria in **AirX Odour Eater** are living organisms & need food to grow & multiply. Once they contact organic matter, they go to work digesting otherwise impossible to remove odors & stains. **AirX Odour Eater** eliminates odors & stains quickly & effectively because every litre is certified to contain at least 50 Billion bacteria.

Benefits

- **50 BILLION ENZYME PRODUCING BACTERIA IN EVERY LITRE** - This astronomical figure is certified to be correct, & is important to you because the thoroughness & speed with which an enzyme producing product digests stains & the cause of odours is directly related to its bacteria count.

- **A SYNERGISTIC BLEND OF CULTURES** for broad spectrum effectiveness. Not just a single strain as are so many competitive products.
- **PEOPLE SAFE** - Acts by liquefying & digesting organic stains & odours by enzymatic action. The only by-products produced in the process are carbon dioxide, water & additional safe bacteria.
- **ENVIRONMENTALLY SAFE** - Bacteria that have multiplied during the use of **AirX Odour Eater** are a help in waterways & water treatment facilities because they help seed the natural biodegradation of water borne waste.
- **SAFE ON CONTACT SURFACES** - There's no heat generated to cause leaking pipes. No solvents to dissolve the backing of carpets or to craze plastics. No acids to etch floors or the grouting around the toilets & urinals.
- **LONG SHELF LIFE** - The bacteria in **AirX Odour Eater** are in the form of spores with a protective shell that keeps them dormant until the product is removed from the container & contacts organic matter.

AirX Odour Eater Bio-enzymatic Foul Odour Digester

AirX Odour Eater is a synergistic blend of specialized strains of live but safe-to-use bacteria chosen for their ability to digest the organic matter that causes odours. **AirX Odour Eater** also contains Airicide odour counteractant to remove odours already in the air.

Uses

Digests foul odours: in & around urinals & toilet fixtures, chemical toilets & waste containers etc; in urinal drains & traps; in carpets, upholstery & fabrics

Removes stains from urine, feces vomit blood, wine, coffee & other organic matter.

Directions

TO DIGEST FOUL ODORS AROUND URINALS & TOILETS ETC – Dilute **AirX Odour Eater** with water & use to clean contaminated area. While the surface is still wet, spray with full strength **AirX Odour Eater**. Continue using daily until odors are digested, then use weekly or monthly.

TO DIGEST ODORS IN URINAL TRAPS – Initially, when urinal will not be used for a while, add **AirX Odour Eater** at the recommended rate.

TO DIGEST ODORS IN CARPETS & UPHOLSTERY – Dilute **AirX Odour Eater** at the recommended rate. Test fibers for colorfastness. If colorfast, use solution to clean soiled area. After cleaning, spray with full strength **AirX Odour Eater**. Rinse with water & then blot up or pick up with wet vac.

Specifications

BACTERIA COUNT 50 billion per litre
BACTERIA STRAINS. bacillus subtilis, polymyxo & licheni formis
SALMONELLA CONTENT none
SHELF LIFE STABILITY 12 months
APPEARANCE. white turbid liquid
SPECIFIC GRAVITY 1.0
ODOUR OF LIQUID airicide
PH OF CONCENTRATE 5.0 +/- 0.5
