

PRODUCT INFORMATION SHEET

Chemflo Bright

Chemflo Bright is a granular free flowing white oxygen bleach powder with a mild lemon fragrance

FEATURES

- Chemflo Bright is very easy to use. It can be used on all normal washable fabrics unlike chlorine bleach, which can only be used on white fabrics. Simply add Chemflo Bright to the wash in addition to the laundry detergent, or use it to soak stained items.
- Chemflo Bright has a mild lemon fragrance. It doesn't leave a chlorine odour on fabrics, crockery or plastic ware.
- Chemflo Bright is a complete product containing enzymes and detergents which help with general cleaning as well as removing bleachable stains.
- It is also safe for the environment containing biodegradable detergents

HOW TO USE

- As a soaker: Add from 1/8 cup in a small bucket (about 10 litre capacity) to 1/4 cup in a large nappy bucket or laundry trough. Soak items for 1-2 hours or overnight if desired. Most stains will be removed by soaking in warm water. If the stain is very difficult to remove use hot water which boosts the power (as long as the fabric is not damaged in hot water).
