

PRODUCT INFORMATION SHEET
Evolution

Premium Grade Machine Dishwashing Liquid with High Descaling Ability

FEATURES

- Evolution contains a special blend of five scale control ingredients. These act synergistically to prevent scale forming even when used at a low concentration.
- Evolution is concentrated with a use dilution in the range 1.0 to 1.5g/l. With electronic control to ensure accurate dosage the product is highly economical to use.
- Now coloured red, the product is easy to see in the pick up tubes. Customers can now easily see when the drum is empty, even if stored under the bench.
- Evolution contains a blend of corrosion inhibitors to protect your dishwasher, crockery and pots and pans.
- Evolution is extremely easy to use as it is automatically dispensed by an electronic feeder

HOW TO USE

- When the drum is empty simply remove the dip tube and put it into the new Evolution drum. Take care to ensure no product is dripped or splashed onto the skin. Safety goggles are recommended to protect your eyes.
- Evolution must only be used through an electronic feeder. It should not be added manually or used for manual dishwashing
