

Magnum

Non-caustic Premium Grade Machine Dishwashing & Glasswashing Detergent

FEATURES

- Magnum is the new safer approach to machine dishwashing and glasswashing. The formulation is non caustic and contains a unique blend of alkalis, dispersants and scale inhibitors. It makes dispensing product into glasswashers much safer.
- Magnum is available in a carton of 3x5lt's for manual addition to glasswashers
- Magnum has been designed for use in hard or soft water. At its economical use dilution of 1.5g/l it keeps machines scale free even in hard water.
- A special blend of corrosion inhibitors in Magnum protects your machine, crockery, glasses and pots and pans.

HOW TO USE

- Magnum can be used on commercial dishwashers or glasswashers. On dishwashers it is dispensed by an electronic or venturi feeder, or added manually to the wash tank.
- Magnum is coloured red so it is easy to see when the container is empty as the pick up tube is no longer red.
- For glasswashers that need manual addition dilute Magnum with water before adding to detergent tank. Refer to label for directions.
- Magnum is designed for use in commercial dishwashers and glasswashers. Do not use for manual dishwashing or glasswashing
