

PRODUCT INFORMATION SHEET

Super Soft

Super Soft is an extra mild cleanser designed for those who need to wash their hands frequently basis

FEATURES

- Super soft is a creamy pearlescent liquid with a mild cosmetic fragrance. It is an extra mild cleanser designed for staff in nursing homes and hospitals that need to wash their hands on a very frequent basis. It is also suitable for washing the face and all over the body.
- Super Soft is based on a blend of extremely mild cleansers commonly used in baby shampoos and other mild products. The soft cleanser do not degease the skin, even with frequent washing.
- Super Soft contains a blend of special moisturisers and emollients to help protect the skin and leave it feeling silky soft.
- Super Soft has a pH of 6 and so will not affect the pH balance of the skin, unlike soap based products which often have a pH over 10

HOW TO USE

- Super Soft can be used through most refillable soap dispensers. Simply squirt a small amount onto wetted skin, work into a lather and rinse off.
- In the shower add a small amount to a sponge or face cloth. Add water and squeeze the sponge or face cloth to form a foam, then apply all over the body.
- This will leave the skin feeling beautifully soft
