

PRODUCT INFORMATION SHEET

Window Cleaner

Window Cleaner is a clear blue liquid with an ammonia odour. It is used for cleaning windows, mirrors and shiny surfaces such as chrome and stainless steel

FEATURES

- Window Cleaner is a clear blue liquid with an ammonia odour. It is used for cleaning windows, mirrors and shiny surfaces such as chrome and stainless steel.
- Window Cleaner contains a special blend of solvents and detergents which enables it to dry quickly to a streak free finish. This makes the job fast and easy and always leads to excellent results.
- Window Cleaner contains a special blend of solvents and ammonia to help with grease cutting, but the blend used does not lead to irritation or choking even in enclosed spaces.

HOW TO USE

- Decant into a trigger spray. Window Cleaner is best used neat. If soil levels are low it may be diluted with some water, but this will increase drying time
- Spray onto window, mirror or other surfaces, then wipe off with a paper towel or clean absorbent cloth. If using cloths cotton gives best results
- Adjust trigger spray to give a fairly coarse spray pattern. If adjusted too fine it will form a mist which will waste product and may lead to irritation
- Window Cleaner may be used on windows, mirrors, polished stainless steel, chrome, etc. It is ideal for car detailing as well as general housekeeping
